51758   Installation instructions for S2211 SIP Phone modified for Arbour on Grey

1. Secure finalised HW1460 panel (51774) to wall using suitable M4 self tapping screws by at least 1 point top and bottom via the mounting holes denoted 'A' in drawing HW1460 rev 2.

    Note: Excess holes have been provided to accommodate for various mounting situations.

2. Connect the modified S2211 SIP phones (51758) keystone to the internal Cat 5 wall cabling as shown in Figure 1.

3. Attach the rear of the S2211 unit to the wall plate via the screws added to the panel during step 2.
