INTEGRATION

GEUTEBRÜCK

Overview

The Jacques - Geutebruck High Level Interface (HLI) allows the Jacques Integrated Communication system (650 series) to integrate to Geutebruck G-Link Server. The intergration supports events whereby if Video Open event is received, Jacques intercom call event is triggered. If Video Close event is received, the call event at Jacques intercom call is terminated.

The integration also supports the activation of a call if a selected 3rd party camera is opened.

Functionality

The below listed intercom functionality is available in the Geutebruck G-Link System
